

INSTRUCTIONS FOR C-MORE SCHOLARS APPLICATION - RENEWAL

This application is for those seeking renewal of their current C-MORE Scholars traineeship, internship, or fellowship. It is also for past awardees that are looking to renew at a different level (see below for descriptions). *NOTE: An award may not necessarily be given at the level to which you applied. Moreover, renewal of award is based on several factors, including academic performance, your past performance as a C-MORE Scholar, how closely your academic interests are related to the ocean and earth sciences, etc.*

1. Level I – Traineeship

Students applying for this category are usually freshmen or sophomores in college, and receive close mentoring in order to learn basic science concepts, research methods, and computer skills. Trainees typically work 10 -15 hours a week and receive an hourly wage. Each trainee is required to give a poster presentation at the end of the semester.

2. Level II – Internship

Applicants for internships are typically sophomores or juniors in college who have taken some science coursework already. This intern experience will show the student the links between what they have learned in the classroom and “real life” research and careers. The intern experience may be with an UH faculty or with a company/agency outside of the university. Interns work 15-20 hours per week, receive a stipend of \$3,000/semester, and must give an oral presentation at the end of the semester about their intern experience. They may also be asked to spend one day per semester on an outreach/service project related to science.

3. Level III – Fellowship

Students applying for fellowships are juniors or seniors in college and usually have spent a semester or two as an intern. They work independently on a research project, such as their senior thesis. They are mentored by either an UH faculty member or someone from a company/agency outside of the university. They receive a stipend of \$4,000/semester and are required to give an oral presentation at the end of the semester. They may also be asked to spend one day per semester on an outreach/service project related to science.
